**Re: Letter of Recommendation**

New England Arborists (NEA) have been under contract for the past five years to assist with the management and care of the arboretum at Hunter's Run Tax District. They have performed their assignment in a highly satisfactory manner. In autumn 2017, NEA was retained to survey and categorize our tree stock. They surveyed all of the trees in the landscaped portion of the property, and identified and categorized some nineteen hundred trees that were at least eight inches in diameter and/or fifteen feet tall. By identifying those tree that needed to be removed and those that had to be included on a watch list, the Hunter's Run management team was able to budget and implement a long term tree management program.

NEA performed its contract in a highly professional manner. They finished the work ahead of schedule and within the budget. The Hunter's Run Tax District was pleased and commended NEA for its fine work. As president of the Tax District, I would highly recommend NEA.

Very truly yours,

Thomas S. Finn
